

The following were floated in meetings or etc, but language hasn't been drafted yet:

- definition of consensus
 - including an ability to “stand aside” rather than “vote no” (see [Decision Making](#) for lots of resources)
 - the temporary-ness of the compact (or it's limited scope)
 - expiration date?
 - what kinds of decisions require **A Decision** and which do not
-

Some thoughts:

what kinds of decisions require **A Decision** and which do not

Maybe we trust the ensemble to know when **A Decision** is necessary. The [revision-1b](#) has this language: “Any active member can call for a decision to be made and recorded at any time.”

But it certainly doesn't hurt to offer guidelines. Possibly in a supplemental document? or an appendix?
